

- **Extend the serviceable life of your assets**
- **Accelerate surface preparation and painting operations**
- **Remove the toughest... mil scale, elastomeric, non-skid, and chlorinated rubber coatings**
- **Create surface profiles 0-5+mils (0-125 micron)**
- **Reduce abrasive handling and waste disposal**
- **12x faster than power tools**
- **Clean and degrease without water or liquid detergents**
- **Reduce costs compared to conventional surface preparation**
- **Precisely blast and repaint on sensitive substrates**
- **Selectively strip coatings and remove contaminants**
- **Sponge Media™ abrasive rebound does not impinge adjacent coated surfaces**
- **Increased visibility during blasting**
- **Fugitive emissions greatly reduced compared to conventional abrasives**

Military/Government Applications

Surface Preparation Solutions for Military and Civil Services

Sponge-Jet's low dust abrasive blasting technology is widely used by military and national security forces domestically and abroad. Among its many benefits is the ability to increase the serviceable life of sea, air and land related assets.

Sponge-Jet Customers...

- BAE Systems
- General Dynamics / Electric Boat Corporation
- Letterkenny Army Depot
- Northrop Grumman - Avondale
- Northrop Grumman - Kings Bay
- Northrop Grumman - Newport News
- Northrop Grumman - Pascagoula
- Puget Sound Naval Shipyard
- Todd Pacific Shipyard
- US Army Fort Gordon
- US Army National Guard
- US Coast Guard
- US Logistics Base
- US Navy Contractor Anteon Corporation
- US Navy Texas Sima
- Lockheed Martin

Sponge-Jet Applications...

- Depainting RAF Harrier aircraft composite skin
- Submarine bow planes, dive planes, baffles, sales; areas prohibited to abrasive blasting (e.g. near Hydraulics, electronics, seals and bearings)
- Military vehicles, trailers; aluminum, Kevlar and fiberglass humvees
- Track and wheel-based combat and general transport vehicles
- Aircraft carrier bilges
- LPD boats (e.g. hot oil tanks, bilges, engine rooms)
- All non-ferrous metal surfaces on aircraft carriers
- Coast guard cutter hulls and bilges
- Radar boxes, containers and portable bridges
- Phalanx close-In weapon systems

Blast Where You Want.
